Why Realtime Colors?

Saves Time

No need to spend hours implementing different variations of colors. Decide right away!

It's Realistic

Color Palettes make it hard to pick. This tool distributes the colors on a real website.

It's Simple

Push a few buttons, and there you have it! Your very own branding colors, ready to export.

How Does It Work?

Get your personalized color palette in 4 steps.

- 1 Start with two neutral colors for the text and the background.
- 2 Choose your primary and secondary colors. Primary is for main CTAs and sections, and Secondary is for less important buttons and info cards.
- 3 Accent color is an additional color. It appears in images, highlights, hyperlinks, boxes, cards, etc.
- 4 Happy with the results? Press on "Export" and choose among different options to export in various formats, like .zip, .png, CSS, SCSS, QR Code, and more.

Plans + Pricing

The tool is 100% free! This is just a generic section.

BASIC

Free

- ✓ Choose any color
- ✓ Export all you want
